DETAILED ACTION

Claims 1-12 are pending in the application.

Priority

1. Any non-provisional application claiming the benefit of one or more prior filed copending nonprovisional applications or international applications designating the United States of America must contain or be amended to contain in the first sentence of the specification following the title a reference to each such prior application, identifying it by application number (consisting of the series code and serial number) or international application number and international filing date and indicating the relationship of the applications. Cross-references to other related application(s) may be made when appropriate.

"This application is a national stage entry under 35 U.S.C. § 371 of PCT/GB00/01875, filed May 16, 2000." is suggested.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following reason(s) applies:

a) Claim 12 provides for the use of quetiapine, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim 12 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Meltzer et al., Journal of Clinical Psychiatry. Meltzer teaches the compounds of the instant invention where the compound is described in the second line from the bottom of column 1 on page 19 (as well as through out the entire reference).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meltzer et al., Journal of Clinical Psychiatry. Meltzer teaches the method of use of the compound of the instant invention as an atypical antipsychotic. Meltzer discusses the side effect associated with atypical antipsychotics such as weight gain, where clozapine has marked weight gain, olanzapine has moderate weight gain and risperidone and quetiapine have mild weight gain as shown in Table 1. Meltzer also states that the adverse effects to be aware of with atypical drugs are the following (listed with the drug(s) most likely to cause them): seizures - clozapine; sedation - clozapine, quetiapine and olanzapine; orthostatic hypotension - clozapine, quetiapine, olanzapine and risperidone (if rapidly titrated); anticholinergic effects - clozapine and olanzapine; weight gain - clozapine and olanzapine; prolactin increases - risperidone; hepatic

changes - clozapine and risperidone; and agranulocytosis - clozapine. In view of the nature of the study conducted by Meltzer, one of ordinary skill in the art at the time the invention was made would have been motivated to select for example quetiapine as an effective atypical antipsychotic with minimal weight gain.
